

The Blaine County Treasurer's Office believes that the strength of our county rests upon the shoulders of its citizens. We want to foster community involvement by helping to create an environment where strong families and friendships can grow alongside economic opportunities and growth. By teaching our children the importance of public works and services, while also empathizing the importance of accountability and responsibility, we can instill within them the value and meaning of "community" and provide a solid platform from which our children can stand and face the challenges of tomorrow.

The Treasurer's Office is proud to work with several youth groups in Blaine County. In our work with students, we demonstrate how public service employees work to better our community while also providing insight and avenues for how they too can do the same. We have been a part of the Blaine County School District's "Wood River Works" program, the Sage School's "Public Sector Work Study Project," and have also worked with local Cub Scouts to help Blaine County students establish a positive vision of community.
